Note 20 Fair Value Measurements

A. Fair Value Hierarchy

1. Included in the Company's statement of financial position as financial assets measured at fair value after initial recognition are non-affiliate equity securities and bonds with an NAIC designation of 3 or above where fair value is less than amortized cost. Equity securities are measured at fair value utilizing Level 1 inputs and respective bonds are measured utilizing Level 2 inputs. The Company obtains fair value measurements from independent pricing services through its investment advisor.

Assets and liabilities recorded at fair value are categorized based on the level of judgement associated with inputs used to measure their fair value and the level of market price observability, as follows:

<u>Level 1 inputs</u> – Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

<u>Level 2 inputs</u> – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.), or inputs that are derived principally from or corroborated by market data by correlation or other means.

<u>Level 3 inputs</u> – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

As of June 30, 2024, there were no transfers between levels 1, 2 and 3 of the fair value hierarchy.

The following table summarizes information about the Company's financial assets measured at fair value on a recurring basis as of June 30, 2024, and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value:

The pricing models use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation.
